- ✓ K 107 has the look, red color to the ground and pigment on eyes and scrotum. Then add his balance, eye appeal and length of side coupled with a big top and hip. "Icing on the cake" is his big spread from BW to YW and CHB. Just think of the calves he will produce!
- ✓ Posted an adj. YW of 1302 lbs.
- ✓ Ranks in the top 1% of the breed for YW, SC, CW, CHB; top 2% for WW, M&G; top 5% for REA; top 8% for Milk.

- ✓ Take note here. K125 is one of those bulls that is a stud—a standout since he hit the ground. Sound moving from the ground up, super stout and thick with tons of body and substance. Then add two big goggle red eyes. He is red necked and red to the ground. Plus a nice number for his calving ease EPD at +8.5 and an actual birth weight of 70 lbs. K125 could sire some outstanding calves on any type of cows.
- ✓ Ranks in the top 1% of the breed for Fat; top 2% for REA; top 3% for BMI; top 5% for BI.

- ✓ Homozygous Polled.
- ✓ K112 will be an eye catcher, as well as his full brother K109, Lot 108. Their dam, G21, is a full sib to herd sire Genesis.
- ✓ This bull's overall presentation, striking red color and goggle eye combines with his overall mass, deep rib shape and soundness. He will add dimension and power to his calves.
- ✓ Ranks in the top 2% of the breed for CW; top 4% for REA, BMI, BI, CHB.

- ✓ Ranks in the top 2% of the breed for REA.

HOW MUCH CAN YOU AFFORD TO PAY FOR A TOP BULL?

COWMAN FORMULA

Increase in pounds per calf from a top performance bull

No. of cows bred to him per year

No. of years to keep the bull

Expected selling price of calves

= Additional dollars you can pay for a better bull

Example: A bull that will add 30 lbs. over industry average to the weaning weight of his calves mated to 25 cows per year for 4 years and you sell the calves for \$2.50 per pound, at current market prices.

30 lbs. 25 cows = 750 lbs. 4 years = 3000 lbs. \$2.50 = \$7,500

This bull is worth \$7,500 **more** than the average bull that will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.
